Reference Number:	SITA/20260327/2860
BPS Vacancy Number:	VAC00152/27
Job Title:	Senior Software Developer
Job Level:	D2
Vacancy Type:	Internal & External
Salary Range:	R651627.00 - R977440.00
Organisation Name:	State Information Technology Agency
Division:	ADM: Exec Apps Development & Maintain
Department:	AM: Integration, API Management & Data Analytics (MIS)
Employment Type:	Contract
Contract Duration:	3 years
Location:	SITA Centurion
Number Of Openings:	1

Purpose of Job:

To lead the design, implementation, debugging, documentation, release and maintenance of software based solutions, write code and enhance software systems in accordance with ICT standards and the enterprise architecture for Government

Responsibilities:

- Lead the design and development of new features for the software systems, and improvement of the existing ones;
- Implementation, debugging, documentation and release of the software solutions;
- Provide maintenance and enhancement support of the existing systems;
- Perform software systems coding assignments; and System Testing
- Supervision of the Software development team

Qualifications and Experience:

Minimum: 3 years National Higher Diploma/ Bachelor's degree in ICT (Computer Science, Information Systems, Technology and Engineering) or related field.

Experience: 6-7 years' experience with full software development lifecycle (SLDC), including solution analysis, development, implementation and maintenance/enhancements of systems within the corporate/public sector. Operational responsibility in a large corporate/public sector organisation. Extensive experience with a wide variety of software development tools, front-end technologies and database management systems. A proven track record in developing and implementing applications, demonstrating leadership in software development teams, and effectively planning, estimating, and managing the execution of development deliverables.

In-depth knowledge of ASP.NET Web Forms, C#, VB.NET, Microsoft Visual Studio, DevExpress, Bootstrap, JavaScript, HTML5, CSS3, Google Maps API, Leaflet, LINQ, Entity Framework and MS SQL Server are essential

Knowledge:

Solid understanding of computer science including algorithms, data structures, operating systems and databases. ICT Governance and Compliance Governance e.g. COBIT and ITIL. Strong knowledge to design test plans according to the software requirements specification. Broad and extensive knowledge of the software development process and its technologies. Knowledge of design techniques and tools involved in the production of software requirements specifications, models and designs. Strong knowledge of user interfaces, solution integration strategies and tools. Knowledge of cloud computing, source control and version control tools like Git and SVN. Understanding of virtualisation and containerisation (Docker, Kubernetes), DevOps (Continuous Integration, Continuous Delivery, Continuous Testing, Continuous Monitoring Infrastructure as Code, Config Management) and Agile Methodologies (Feature-Driven Development, Test-Driven Development, Scrum, Extreme Programming). Extensive background in coding, software testing techniques and tools. Knowledge of software team leadership, IT Quality Management e.g. ISO9001 and CMMI, IT Strategies and Architectures. Strong knowledge of data integration tools and architecture methods and practices e.g. TOGAF and GWEA.

Technical Competencies

Application Development

The specification and design of software to meet defined requirements by following agreed design standards and principles. The definition of software, components, interfaces and related characteristics. The identification of concepts and patterns and the translation into a design which provides a basis for software construction and verification. The evaluation of alternative solutions and trade-offs. The facilitation of design decisions within the constraints of systems designs, design standards, quality, feasibility, extensibility and maintainability. The development and iteration of prototypes/simulations to enable informed decision-making. The adoption and adaptation of software design models, tools and techniques based on the context of the work and selecting appropriately from predictive (plan-driven) approaches or adaptive (iterative/agile) approaches.

Database Administration

The installation, configuration, upgrade, administration, monitoring and maintenance of databases. Pro

Interpersonal and Behavioural Competencies

Attention to Detail

The ability to ensure information is complete and accurate.

Analytical thinking

Identifies issues; obtains relevant information, relates and compares data from different sources, and identifies alternative solutions.

Continuous Learning

The ability to constantly expand one's skill set.

Disciplined

Showing a controlled form of behaviour or way of working, diligently.

Resilience

The ability to effectively handle disappointment, rejection and set-backs while still working well and meeting deadlines.

Stress Management

The ability to keep functioning effectively when under pressure and maintain self control in the adversity.

Additional Requirements

N/A
