Vacancy Information Download

Reference Number:	SITA/20260827/3093
BPS Vacancy Number:	VAC00777/27
Job Title:	Senior Software Developer
Job Level:	D2
Vacancy Type:	Internal & External
Salary Range:	R651627.00 - R977440.00
Organisation Name:	State Information Technology Agency
Division:	Applications
Department:	AM: SAPS Unique
Employment Type:	Contract
Contract Duration:	36-Months-Fixed Term Contract
Location:	SITA Centurion
Number Of Openings:	1

Purpose of Job:

To lead the design, implementation, debugging, documentation, release and maintenance of software-based solutions, write code and enhance software/systems in accordance with ICT standards and the enterprise architecture for Government.

Responsibilities:

- Lead the design and development of new features for the software systems, and improvement of the existing ones;
- Implementation, debugging, documentation and release of the software solutions;
- Provide maintenance and enhancement support of the existing systems;
- Perform software systems coding assignments; and
- Supervision of the Junior Software Developers.

Qualifications and Experience:

Minimum:3 Years National Diploma/ bachelor's degree in ICT (Computer Science, Information Systems, Technology and Engineering) or related field.

Experience:6-7 years' experience with full software development lifecycle (SLDC), including solution development, operational responsibility in a large corporate/public sector organisation.

Strong background in application database administration or Database administration within large corporate or public sector organisations.

Hands-on experience with:

- Microsoft SQL Database Administration (installation, configuration, backup/recovery, performance tuning, patching and upgrades).
- Query & Code Optimization – Analyze, troubleshoot, and optimize complex T-SQL queries, stored procedures, and triggers.
- Application Integration Support– advanced proficiency in T-SQL development, knowledge of C# or ASP.NET and Classic ASP.
- Release & Deployment Management– manage database schema changes, migrations, deployment of application changes and patch releases.
- Performance Monitoring– SQL Server performance troubleshooting and troubleshooting application-level database bottlenecks.
- SQL Server Reporting Services – management, administration, configuration and troubleshooting.

Basic understanding of JavaScript/VBScript and HTML is a plus (sufficient to support integration and troubleshooting). Strong understanding of relational database design, normalization, and schema management.

Proven ability to:

- Perform solution analysis, deployment, and implementation in complex environments.
- Lead or guide development/support teams, including effort estimation and execution management.
- Develop efficient and effective IT solutions for complex business problems.
- Maintain and optimize a variety of database management systems.

Extensive experience with a wide variety of database management systems and maintenance. Extensive experience with a wide variety of programming languages and technologies. Extensive experience of working on multiple tasks and report status. Experience in interacting with customers.

Knowledge:
Solid understanding of computer science including algorithms, data structures, operating systems and databases. ICT Governance and Compliance Governance e.g. Cobit and ITIL Strong knowledge to design test plans according to the software requirements specification. Broad and extensive knowledge of the software development process and its technologies. Extensive knowledge of design techniques, tools, and principles involved in the production of software requirements specifications, models and designs. Strong knowledge of user interfaces. Strong knowledge of solution Integration strategies and tools Working knowledge of Cloud Computing Strong knowledge source control and version control tools like Git and SVN Working knowledge of virtualisation and containerization (Docker, Kubernetes) Working knowledge of DevOps (Continuous Integration, Continuous Delivery, Continuous Testing, Continuous Monitoring Infrastructure as Code, Config Management) Working knowledge of Agile Methodologies (Feature-Driven Development, Test-Driven Development, Scrum, Extreme Programming) Extensive background in coding Extensive knowledge of software testing techniques and tools knowledge of software team leadership IT Quality Management e.g. ISO9001 and CMMI IT Security ICT Standards COTS (Commercial of the Shelf) Products OSS (Open Source Software) Products IT Strategies and Architectures Strong knowledge of data integration tools Execution of Architecture methods and practices e.g. TOGAF and GWEA.
Technical Competencies
Application Development The specification and design of software to meet defined requirements by following agreed design standards and principles. The definition of software, components, interfaces and related characteristics. The identification of concepts and patterns and the translation into a design which provides a basis for software construction and verification. The evaluation of alternative solutions and trade-offs. The facilitation of design decisions within the constraints of systems designs, design standards, quality, feasibility, extensibility and maintainability. The development and iteration of prototypes/simulations to enable informed decision-making. The adoption and adaptation of software design models, tools and techniques based on the context of the work and selecting appropriately from predictive (plan-driven) approaches or adaptive (iterative/agile) approaches. Database Administration The installation, configuration, upgrade, administration, monitoring and maintenance of databases. Pro
Interpersonal and Behavioural Competencies
Attention to Detail The ability to ensures information is complete and accurate. Analytical thinking Identifies issues; obtains relevant information, relates and compares data from different sources, and identifies alternative solutions. Continuous Learning The ability to constantly expand one's skill set. Disciplined Showing a controlled form of behaviour or way of working, diligently. Resilience The ability to effectively handle disappointment, rejection and set-backs while still working well and meeting deadlines. Stress Management The ability to keep functioning effectively when under pressure and maintain self control in the adversity.
Additional Requirements
N/A
How to apply

To apply please log onto the e-Government Portal: <http://www.eservices.gov.za/> and follow the following process;

1. Register using your ID and personal information;
2. Use received one-time pin to complete the registration;
3. Log in using your username and password;
4. Click on "Employment & Labour";
5. Click on "Recruitment Citizen" to create profile, update profile, browse and apply for jobs;

Or, if candidate has registered on eservices portal, access <http://www.eservices.gov.za/>, then follow the below steps:

1. Click on "Employment & Labour";
2. Click on "Recruitment Citizen";
3. Log in using your username and password;
4. Click on "Recruitment Citizen" to create profile, update profile, browse and apply for jobs;
